About GreenTCNJ

What is GreenTCNJ?

GreenTCNJ is a mobile application developed for The Offices of Environmental Health and Safety and Sustainability and Energy Management at The College of New Jersey to support green initiatives on campus.

What functionality does GreenTCNJ provide?

GreenTCNJ's functionality includes viewing and signing up for environment related events, viewing campus resources, and viewing guidelines for how to recycle specific materials. Using the app, members of the campus community can view a schedule of upcoming events, view news articles, and scan a QR code to mark their attendance at an event. They can report issues with the application or provide feedback on green initiatives on campus, and can submit requests for new guidelines for recycling specific materials.

How do I use GreenTCNJ?

To use the GreenTCNJ mobile application, the user must be on campus and connected to TCNJ Wi-Fi. To access the app from off campus, the user needs to be logged into TCNJ's VPN with an active campus community member's credentials. Once either connected to the Wi-Fi or VPN, if the user has not used the application before, they will need to create an account. After creating an account, the user can log in and have access to all of GreenTCNJ's functionality.

Where can I find the Privacy Policy for GreenTCNJ?

You can find the Privacy Policy for GreenTCNJ here: [Environmental Programs | Environmental Health and Safety (tcnj.edu)](#).

What if I have questions about GreenTCNJ?

You can reach out to The Office of Occupational Safety and Environmental Services at osesstud@tcnj.edu with any questions you may have. Additionally, if you would like to report any app issues, you can do so from the Help/Report Issues page within the app.

GreenTCNJ Development

The mobile application has been developed by TCNJ Computer Science undergraduate students under the guidance of Dr. Deborah Knox, and in collaboration with Amanda Radosti, within the Office of Environmental Health and Safety.
